**Your Community-
Owned Utility**

BMLD's CEAP

Belmont Light will pay the first \$2,000 towards an audit for all commercial customers. Full-scale audits are available at substantial discounts. Please call (888) 772-4242 for details.

Did you know about...?

BMLD's Commercial Energy Audit Program

BMLD offers \$2,000 towards an energy reduction audits for commercial customers that includes an energy savings analysis report with suggestions on how your company can reduce your monthly energy usage?

Many business owners are interested in improving the energy efficiency of their buildings but do not know how to identify which improvements present the most effective investment opportunities. BMLD's Energy Auditors can provide a walk-through of your building to help identify cost-efficient opportunities to improve your building's energy efficiency and reduce your energy operating costs.

For details and other information, visit www.belmont-ma.gov/electric and follow the Conservation link, or to schedule an audit call the Energy Hotline at **(888) 772-4242**.

BMLD also encourages the use of energy efficient products. In fact, come by our office for a free CFL bulb.

Energy efficient compact fluorescent bulbs last up to 10 times longer than standard incandescent bulbs and use 70% less electricity - which translates to a savings of \$20 - \$40 in electricity over the life of the bulb. Plus you'll help reduce the need to burn fossil fuels to produce the electricity. For example, over its life a 15w fluorescent, which replaces a 60w incandescent, will save the equivalent of 30 gallons of oil.
