

# Energy services available to improve efficiency

**W**e would like to remind our customers that energy efficiency information is just a phone call away. BMLD has partnered with Energy New England to provide energy services to our residential customers. In addition to calling Energy Services at BMLD, you may **call the ENE Energy Hotline toll-free at (888) 772-4242** to answer any questions you may have about ways to reduce energy costs, as well as questions you may have about energy efficiency or energy conservation measures. The phone is manned Monday through Friday, 8 a.m.-4 p.m., and you will be able to speak with a highly trained — and totally objective — energy advisor at no cost to you.

## APPLIANCE REBATES AVAILABLE

BMLD is offering rebates on Energy Star® rated clothes washers, air conditioners, refrigerators, and dishwashers. Please visit [www.town.belmont.ma.us/electric](http://www.town.belmont.ma.us/electric) or call 617-993-2800 for more details or to obtain an application.

Should you have more detailed questions, you may be eligible to have an energy audit to evaluate the energy saving potential in specific areas of your home at no cost to you. The advisor will provide useful information and tips on appliance usage and will give you a computerized report detailing recommendations and payback time for any improvements suggested. While at your home, the advisor will also install up to \$30 of energy saving

materials. The entire audit usually takes about 1½ hours to complete.
